Larry, Kilgallen's 3/7 story on CIA police training confirms the instant analysis that I gave you, that your cops had to have been among those involved. It adds to what I knew in showing the spidering of the spooks through the larger police departments. It may or may not explain my first inkling. I know a detective who in his training (he did not say by the CIA) he saw and studied the Zapruder film, movie and slides (I discovered the CIA's desire for a copy of the film long before this recently-reported period and published in Photo WW). Studying that is hardly the usual police work, nor was it covered by any of the official explanations. This story adds to what was taught clandestine photography. Well, maybe. Anyway, your [illegible] H.T.Smith got such training. Why not [illegible] he studied the Z film but why he studied it. I'm not sure he did but I suggest if you ask, begin by an affirmative declaration of knowledge.
